DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 12/01/2003 is being considered by the examiner. However it is noted that the IDS contains a duplicate of the first page as a second page.

Specification

2. The specification is objected to because of the following informalities: [0064] the address of the ATCC has changed. The new address is: 10801 University Boulevard, Manassas, VA. 20110-2209

Appropriate correction is required.

Election/Restrictions

3. In the reply filed on 10/12/2006, the Applicant elected, **without** traverse, claims 1-14 and the species IL-6 for sequence (a). However, claims 5-12 contain non-elected species for sequence (a) and consequently are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. The claims 1-4, 13 and 14 are under consideration.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1647

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 contains, in part b), indefinite language like "natural" heterodimeric scaffold. It is unclear how one can distinguish, once the protein is made, if it is "natural" or not. In the same part of the paragraph, the term "corresponding" is used without any explanation to what it refers to. Does the "corresponding" refer to structural, interspecies or functional features? The term "long half life" (compared to what?) is a relative term that, by not being explained, renders the claim indefinite.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 13 and 14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1, 2, 4, 5, 14 and 15 of U.S. Patent No. 6,193,972. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are with the exception of claim 1 b), word for word the claims of the patent mentioned above. With respect to the wording of Claim 1 b) of the application the qualifiers added to the language of the Claim 1 b) of the patent are not limiting in any way the claims of the patent.

Conclusion

6. No claims are allowed.
